

Benefits of our partnership

- HPC is one of the UK's largest and most successful compressed air solution providers
- Both CPC and HPC are family businesses sharing the same commitment to customer support and value for money
- With over 20 years experience, CPC provide tailored solutions supported by factory trained, time served technicians
- HPC and CPC supply high quality compressed air products and provide a lifetime of value-added services and support
- CPC can provide competitive service quotes for all makes and types of compressors and compressed air equipment

Performance, Precision, Partnership

HPC | Compressed Air Systems
Authorised Distributor

Contact CPC today for prices and information on air compressors, air treatment products, compressor controllers and air management systems, compressor maintenance, air compressor servicing and pipework system installations.

Chelmer Pneumatics & Compressors Ltd has been appointed by HPC as their Authorised Distributor for Essex and East London.

HPC Compressed Air Systems is recognised as the gold standard in the industry, supplying innovative products and system solutions to the UK's highest quality manufacturing businesses.

A leader in the UK market for fifty years, HPC's "yellow-box" compressed air systems can be found throughout British industry, from workshops and garages to factories and power stations.

Established in 1988 by the present Managing Director Pat Connolly, Chelmer Pneumatics & Compressors (CPC) is a successful family business that has grown from a supplier of pneumatic control equipment and systems into a major provider, designer and installer of complete compressed air systems.

Operating from prestigious premises in Witham, Essex, CPC has worked hard to earn and maintain a reputation for quality and reliability whilst providing compressed air equipment and services to an established customer base across a diverse range of applications.

With an integrated approach based on value and service, CPC's partnership with HPC provides access to the most efficient and reliable compressed air systems with a technical and after sales support infrastructure that is unrivalled. This allows CPC to provide a service that is second to none and permits customers to focus on the efficiency and profitability of their own businesses.

Products

" We supply a premium product and service - not always with the lowest initial capital investment, but always designed to deliver the most economic true lifetime cost of compressed air"

HPC Compressed Air Systems provide quality, reliable, long-term cost-effective solutions to customers' present and future compressed air requirements.

" We are often the only supplier prepared to guarantee our figures for energy efficiency"

HPC's customers are increasingly focused on energy efficiency, to both control costs and reduce their impact on the world's natural resources. HPC always provides the most efficient system solutions while minimising the environmental impact of it's products.

The range of HPC compressed air equipment includes:

- Rotary screw compressors - 2.2 to 450kw (5.5 to 15bar)
- SFC variable frequency compressors
- Packaged air systems
- Refrigerant and Desiccant dryers
- Filtration and air purifying equipment
- Condensate management
- Compressor controllers and air management systems
- Air receivers and storage
- Piston compressors
- High pressure boosters
- Portable compressors
- Rotary blowers, exhausters and vacuum

" We know our compressors inside out because we are part of the manufacturing process"

HPC Precision Engineering partners Kaeser Kompressoren GmbH of Coburg, Germany in the production of Sigma Profile air-ends. To maintain the close-tolerances required to ensure high energy efficiency and long operational reliability, HPC machines to within microns in temperature and humidity controlled environments.

HPC Compressed Air Systems

Servicing

Servicing your Compressed Air System

CPC's servicing commitment is to maintain customers compressed air equipment to the highest level in order to optimise energy efficiency and minimise the risk of disruption, expensive downtime or lost production. CPC's dedicated and experienced team of service technicians and engineers provide 24 hour service cover - 365 days a year. From emergency assistance and service on demand through to scheduled maintenance contracts and total management of compressed air system installations, CPC can provide service solutions for any compressed air plant or requirements supported by skilled, factory trained engineers.

CPC's engineers have access to the latest equipment and information that enables for quick, effective diagnosis of faults and an efficient response. With comprehensive stocks of manufacturers spare parts, CPC are happy to take responsibility for a customers compressed air requirements or to advise and work alongside customers own personnel to ensure that the correct and most cost effective solutions are employed.

CPC has the ability, experience and expertise to manage complete turnkey solutions for projects and installations of any size. Utilising the latest technology, CPC can provide off site monitoring and analysis of a system to provide total peace of mind and ensure that the maximum operating efficiency and an optimum return on investment is achieved.

"CPC is firmly established as a major supplier of pneumatic control equipment and compressed air systems"

CPC's range of compressed air services include:

- Energy saving audits
- Complete turn key installations
- Installed system modifications
- Compressor and dryer hire
- Heat recovery and ductwork
- Air quality testing to food industry and breathing air standards
- Point of use flow metering
- Remote monitoring and diagnostics
- Air leak surveys and repairs
- Insurance inspections
- Carbon Trust loan and ECA advisors
- Preventative maintenance service agreements
- Extended warranty
- Emergency breakdown and 24 hour call out
