

# HPC

## Desiccant & Refrigerant Dryer Service & Maintenance

Not only do HPC supply, install and service compressed air systems we can also service and maintain your gas treatment equipment using our dedicated team of factory trained engineers. Our specialist teams are located throughout the UK offering service and maintenance for mandatory FGAS refrigerant gas leak detection and diagnostic as well as routine maintenance on your compressed air refrigerant dryers of any make only using genuine OEM parts.

We cover ancillary equipment including Compressors, filtration, carbon towers and oil water separates. Our fully project managed services include a comprehensive 12 months warrantee of parts and labour.

Why not get in touch to see how HPC and our authorised distributors to discuss a tailored service in support of you maintaining a reliable compressed air system.

# Supply, install & maintain

## Supply, install and service

Our dryer and gas generation team can supply, install and service compressed air dryer and gas treatment equipment using our dedicated team of OEM trained engineers located throughout the UK. Our trained engineers and specialists in compressed air and nitrogen gas generation also provide professional services for the selection and supply of new equipment, spare parts as well as plant service and maintenance.

## Comprehensive service plans

Contact our dryer and gas generation team to find out about our comprehensive service plans to cover your air treatment, oxygen gas generation, nitrogen gas generation system, spare parts and maintenance needs. We offer and supply a full range of OEM new and replacement elements, dryer components and spare parts. Our fully project managed services include a comprehensive 12 months warranty of parts and labour.

## Certified by dryer OEMs

Not only are our teams trained to support both refrigerant dryer and desiccant dryer technologies but also support a range of gas generation equipment including nitrogen generators and oxygen generators.

Our teams are fully trained and certified by dryer OEMs to support all routine service and maintenance activities as well as more complex diagnostics.

## Boost operational performance

We also offer advice on operational savings including energy assessment audit, new system design and maintain planning that can boost your operational performance saving on your costs while maximising plant and process efficiency.

Get in touch with HPC and our Authorised Distributors to discuss tailored support for a reliable Dryer and Gas Generation system.
