

Environmental Policy

It is the policy of HPC plc to conduct its business in such a way as to prevent pollution and conserve the resources of the world we live in.

We will ensure that all activities are carried out in conformance to the relevant environmental legislation, regulations, guidelines and industry codes of practice.

In the operation of processes we will seek to minimise waste, reduce energy consumption, reduce harmful emissions and, where possible work with suppliers who have similar environmental aims.

In the purchase of compressed air system equipment or manufacturing machinery we will look for products with high energy efficiency and minimum contamination of the environment.

We will take a responsible approach to the disposal of End-of-Life waste by ensuring that redundant electrical equipment, machinery or vehicles are sent for reuse or recycling through approved disposal companies. HPC Offer an end of life take back scheme for our compressors promoting responsible recycling.

Our environmental management system will provide a framework for continual improvement by identifying programmes and setting improvement objectives and targets that are regularly monitored and reviewed.

The company expects its employees to be aware of environmental issues and to have these in mind when undertaking their duties, training will be provided to maintain and increase the level of environmental awareness.

This Policy and the obligations and responsibilities required by the environmental management system have been communicated to all employees. The Policy is available to the public on request.

This policy will be reviewed at every management review and reconfirmed annually by the signatory at a minimum even if the content is unchanged.
