

Telematics 36 @ MOBILAIR

Telematics 36

Available for selected MOBILAIR models.

Prerequisites

You will need to:

- Place a new order (retrofit not available)
- Specify the UMTS/GSM option in your configuration

Advantages for customers

You benefit from:

- Required hardware fitted FREE OF CHARGE
- 36 months of system access FREE OF CHARGE
- Use of all functionality included within the Telematics portal

Advantages for KAESER

KAESER benefits from:

- Data for ongoing product evaluation, facilitating continuous improvement of the KAESER product portfolio

MOBILAIR – always in your sights

The integrated compressor controller determines and processes operating data, which it subsequently forwards to the Telematics system. Central monitoring and processing of operating messages is performed in the dashboard and permits the following remote functionality:

Maintenance planning

Improved maintenance efficiency thanks to early detection of maintenance requirements and initiation of necessary measures at the right point in time.

Operating data display

Collection and evaluation of operating data from MOBILAIR systems.

System overview and detailed machine data

Efficient deployment of MOBILAIR compressors thanks to comprehensive system overview. Access to reliable data for construction site accounting purposes.

Messages and reports

Direct alerts via warning and alarm messages – available at the machine, by E-mail and via the portal. Overview of compressor vitality by means of preset threshold values.

Fleet management

Permanent control of a fleet for maximum efficiency and utilisation. All data, such as fuel consumption and utilisation frequency, available in your system at a glance via the KAESER portal or REST API / AEMP.

Machine tracking via GPS

Global, round-the-clock GPS tracking of MOBILAIR compressor units. Current GPS positional display, including address details on a map.

Geofencing

Determine a unit's exact location and define individual ranges. Should a machine then cross a predefined boundary, a warning message will be dispatched via E-mail.

Agreement covering the sharing and usage of MOBILAIR data

between:

and:

	KAESER Kompressoren SE Carl-Kaeser-Straße. 26 96450 Coburg
--	--

Preamble

Whereas KAESER, as a manufacturer of quality compressed air products that use electronic controllers to display process data, declares itself interested in using this data for the ongoing development of its products and services. Whereas the Customer hereby declares himself/herself willing to cooperate with this and prepared to share such data accordingly. Against this background, the two parties hereby undertake the following:

Items

The items covered by this Agreement comprise process data from the following KAESER products:

No.	Compressor	Reference number
1		
2		

Process data does not include personal information as defined in Art. 4 No. 1 of the General Data Protection Regulation.

Data transfer and costs

The Customer guarantees KAESER access to process data from the afore-mentioned KAESER product(s). The transfer of process data shall take place online via an encrypted, signed data transfer. Bi-directional access to the KAESER product in question or to its electronic controller is neither possible nor permissible.

Costs for providing the technical hardware components required for the online data transfer shall be borne by KAESER. These technical components shall remain the property of KAESER.

For the duration of this Agreement, the Customer shall be provided with access to the data portal. Use of the process data shall otherwise be free from cost to both parties.

Data usage and protection

KAESER shall use the process data exclusively for the purposes of research and development of KAESER products and services, provided that no further agreements exist between the parties in this regard.

KAESER shall be entitled to use the process data for the afore-mentioned purposes, specifically: to collect, save, process, duplicate or otherwise use it as may be required. This right of use shall be granted to KAESER irrevocably, without limitations to time or location.

The Customer shall be entitled to use the process data for their own commercial purposes throughout the duration of the Agreement.

(E-mail address of the person responsible for electronic data transmission)

The Customer and KAESER shall both handle the process data in a confidential manner and take both technical and administrative measures to ensure protection of the data, specifically through an encrypted online data transfer and signed form.

Responsibilities of the customer

The Customer shall handle the hardware components belonging to KAESER with appropriate care and attention and shall not use them for any purposes other than those described in this Agreement.

In case of the onward sale or transfer of the KAESER products mentioned in this Agreement to a third party, or in the case of impairment to the data communications hardware components belonging to KAESER (e.g. due to damage or seizure of goods), the Customer shall immediately inform KAESER in writing and return to KAESER the hardware components belonging to it.

Duration of the agreement

The Agreement shall have a fixed duration of 36 months and, once signed, shall come into effect upon the date of activation.

Upon expiry of this Agreement, KAESER shall be entitled, but not obligated, to remove the technical hardware components belonging to it.

Upon expiry of this Agreement, the Customer may continue to use the process data via KAESER for their own purposes in exchange for payment of the portal costs. In this case, the installed modem shall become the property of the Customer. Before expiry of the Agreement, KAESER shall inform the Customer regarding any opportunities there may be for extending its duration.

Miscellaneous

This Agreement shall be governed by the laws of the Federal Republic of Germany, excluding its conflict of law provisions (private international law).

The place of jurisdiction for any claims or disputes arising from this Agreement shall be Coburg.

In the event that individual provisions or parts of a provision within this Agreement are found to be ineffective, invalid or unenforceable, the validity of the Agreement itself shall not be affected thereby. The ineffective, invalid or unenforceable provision should, insofar as is legally permissible, be replaced by an effective provision, which corresponds to the original intentions of the parties in terms of location, time, scope and application. The parties hereby undertake to agree without delay such a provision in the form provided; the same applies to the rectification of any potential loopholes or deficiencies in the Agreement.

Data protection information

Your personal data will be collected and stored by us for marketing purposes. You can review your personal data stored by us at the following link: <https://www.kaeser.com/int-en/privacy-marketing.aspx>.
